Contents – summary	vii
Preface	ix
Biography of the contributors	xii
Table of contents	xvii
Table of appendices	xxv

Chapter 1 The Emissions Trading Scheme (ETS): The cornerstone of the EU's implementation of the Kyoto protocol

	Paragraph
1. Introduction	1.1
2. The EU's Kyoto Protocol commitments	1.2
3. The European Climate Change Program (ECCP)	1.3
4. The EU ETS	1.4
5. The EU ETS in 2006	1.5
6. Conclusion	1.6

Chapter 2 International climate policy developments of the 1990s: The UNFCCC; the Kyoto protocol; the Marrakech accords and the EU ratification decision

1. Introduction.	2.1
2. International developments	2.2
2.1. The road from Buenos Aires to Marrakech	2.3
2.2. The Commission's special position in the international negotiations	2.4
3. EU measures to reduce greenhouse gas emissions	2.5
3.1. Ratification and burden-sharing, or how to achieve	

	the target jointly and individually.....	2.6
3.2.	The compliance system under the Kyoto Protocol.....	2.7
3.3.	Incentives for compliance within the EU	2.8
3.4.	Specific measures taken at Community level.....	2.9
	3.4.1. The Monitoring Mechanism	2.10
	3.4.2. Boosting ‘Policies and measures’ under the European Climate Change Programme.....	2.11
4.	Conclusion	2.12
	4.1. Achieving the targets	2.13
	4.2. Continuing leadership	2.14

Chapter 3 Basic design options for emissions trading

1.	What is emissions trading?.....	3.1
2.	Five components of emissions trading	3.2
	2.1. The commitment or “entitlement”	3.3
	2.2. Transfer of entitlements.....	3.4
	2.3. Monitoring	3.5
	2.4. Compliance and sanctions	3.6
	2.5. Scarcity	3.7
3.	Scope	3.8
4.	Alternative policy instruments	3.9
5.	What kind of emissions trading?.....	3.10
	5.1. Cap and trade.....	3.11
	5.2. Baseline and credit	3.12
	5.3. Ex post verification	3.13
6.	Type of target	3.14
7.	Direct or indirect emissions.....	3.15
8.	Misunderstandings about emissions trading	3.16
9.	The internal market imperative for an EU scheme	3.17
10.	Future issues	3.18
11.	Conclusion	3.19

Chapter 4 The emissions allowance trading Directive 2003/87/EC explained

1.	Introduction.	4.1
2.	Legal base	4.2
3.	Scope	
	3.1. Coverage of the European Economic Area.....	4.3

Table of contents

3.2.	Geographical coverage	4.4
3.3.	Coverage of gases.....	4.5
3.4.	Coverage of installations	4.6
3.5.	Combustion installations.....	4.7
4.	Greenhouse gas emissions permits.....	4.8
4.1.	Relationship with the IPPC Directive.....	4.9
4.2.	Application of EU ETS to direct emissions	4.10
4.3.	Application of EU ETS to the operators of installations	4.11
4.4.	Change in the identity of an operator	4.12
5.	Method of allocation	4.13
6.	National allocation plans	4.14
6.1.	Content of National Allocation Plans.....	4.15
6.2.	Procedures for National Allocation Plans.....	4.16
6.3.	Revision of the allocation criteria	4.17
7.	New entrants	4.18
8.	Closures	4.19
9.	Allowances	4.20
9.1.	Nature of allowances and linkage with the Kyoto Protocol..	4.21
9.2.	Issue of allowances.....	4.22
9.3.	Transfer of allowances.....	4.23
9.4.	Surrender and cancellation of allowances.....	4.24
9.5.	Banking of allowances	4.25
10.	Monitoring, reporting and verification of emissions	4.26
10.1.	The Commission guidelines	4.27
10.2.	Linkage between monitoring under the EU ETS and the Kyoto Protocol	4.28
11.	Enforcement	4.29
12.	Public participation and Aarhus Convention.....	4.30
13.	Competent authorities and Member State reporting	4.31
14.	Registries	4.32
15.	Climate Change Committee.....	4.33
16.	Unilateral inclusion of additional installations ('opt-in').....	4.34
17.	Links with other greenhouse gas emissions trading schemes.....	4.35
18.	Amendment of the IPPC Directive.....	4.36
18.1.	The IPPC framework	4.37
18.2.	Interaction with the EU ETS	4.38
18.3.	Emission limit values for greenhouse gases.....	4.39
18.4.	Emission limit values for non-greenhouse gases.....	4.40
18.5.	Energy efficiency requirements.....	4.41
19.	Temporary exclusion of installations ('opt-out')	4.42
20.	Pooling	4.43
21.	Force majeure	4.44

22.	Review and further development.....	4.45
23.	Entry into force and Implementation.....	4.46

Chapter 5 The EU ETS linking Directive explained

1.	Introduction.	5.1
2.	The EU ETS: linking challenges.....	5.2
3.	The “linking” Directive: from proposal to adoption.....	5.3
3.1.	Elaboration of the Proposal.....	5.4
3.2.	The Commission Proposal.....	5.5
3.3.	The Compromise Package.....	5.6
4.	CDM and JI in the EU ETS: opportunities and threats	5.7
5.	Linking the EU ETS with CDM and JI – key issues	5.8
5.1.	When to link?.....	5.9
5.2.	How to link?	5.10
5.3.	What projects to link with?.....	5.11
5.4.	How much to link?	5.12
5.5.	Double counting and JI in accession countries.....	5.13
6.	Conclusion	5.14

Chapter 6 Economic analysis of emission trading in CO₂ emissions in the European Union

1.	Introduction.	6.1
----	--------------------	-----

PART I Economic analysis for the Green Paper and Commission Proposal for the EU ETS Directive

2.	Emissions trading in the pre-enlargement European Union.....	6.2
3.	Methodology	6.3
4.	Caveats	6.4
5.	The result	6.5
5.1.	The baseline case.....	6.6
5.2.	The reference case	6.7
5.3.	The economic effects EU-wide emission trading to EU Member States.....	6.8
5.4.	Additional benefit of emissions trading: What if the countries do not start from an equilibrium?	6.9
5.5.	Economic Analysis of the Commission Proposal for the EU ETS directive	6.10

Part II Economic analysis for the Commission Proposal for the Linking Directive

6.	Extending the analysis to EU enlargement and linking of JI and CDM credits to the EU ETS.....	6.11
7.	Methodology	6.12
8.	Caveats	6.13
9.	The results	6.14
9.1.	The baseline case.....	6.15
9.2.	The economic effects of enlargement to the EU-25	6.16
9.3.	The economic effects of allowing JI and CDM credits (“Linking”)	6.17
9.3.1.	Sensitivity analysis.....	6.18
9.3.1.1.	Only EU ETS participants purchasing JI and CDM credits.....	6.19
9.3.1.2.	EU ETS participants and other countries/ companies purchasing JI and CDM credits	6.20

Part III The first year of the EU ETS

10.	The development of the allowance market in 2005.....	6.21
11.	Summary of the results.....	6.22

Chapter 7 The first allocation round: a brief history

1.	Introduction.	7.1
2.	Environmental added-value.....	7.2
3.	Article 10	7.3
4.	Allocation methodologies	7.4
5.	Auctioning	7.5
6.	Allocation for free	7.6
7.	Historical emissions basis.....	7.7
8.	Benchmarks	7.8
9.	Transfers and closures	7.9
10.	New entrants	7.10
11.	Newer and not so new entrants	7.11
12.	The legislative context	7.12
13.	The Commission’s role.....	7.13
14.	Assessing national plans	7.14

15.	The pathfinders	7.15
16.	The United Kingdom	7.16
17.	Germany	7.17
18.	France	7.18
19.	Italy	7.19
20.	Poland	7.20
21.	Other Member States	7.21
22.	Conclusion	7.22

Chapter 8 An introduction to the monitoring and reporting guidelines (Commission Decision 2004/156/EC) and registries regulation (Commission Regulation (EC) No 2216/2004)

1.	Introduction	8.1
2.	The Registries Regulation	8.2
2.1.	Interaction between the Kyoto Protocol and the EU scheme	8.3
2.2.	Overarching structure of the UN and EU registries systems	8.4
2.3.	Communications between and within the registries systems	8.5
2.4.	Structure of an EU registry.....	8.6
2.5.	Explaining the different transaction types	8.7
2.5.1.	Allocation (Articles 38 to 48).....	8.8
2.5.2.	External transfers (Articles 49 to 50) and voluntary cancellation (Article 62).....	8.9
2.5.3.	Surrender (Article 52).....	8.10
2.5.4.	Use of CERs and ERUs and cancellation and retirement (Articles 53, 58 and 59).....	8.11
2.6.	Status and publication of information contained in the registries systems.....	8.12
3.	The Monitoring and Reporting Guidelines.....	8.13
3.1.	Coverage of the guidelines.....	8.14
3.2.	Establishing a monitoring methodology under an emissions permit	8.15
3.3.	The verification process.....	8.16
3.4.	Treatment of biomass and carbon capture and storage.....	8.17
3.5.	Forthcoming revision of the guidelines.....	8.18
4.	Conclusions	8.19

Chapter 9 The potential role of the EU ETS for the development of long-term international climate policies

1.	Introduction	9.1
2.	Kyoto's unfinished business - The challenges ahead of us	9.2
3.	Opportunities until 2030: Making a leap forward towards climate-friendly and wealthy societies	9.3
3.1.	Technological opportunities	9.4
3.2.	Economic affordability.....	9.5
3.3.	Investment opportunities in the energy sector.....	9.6
3.3.1.	Investing in a clean energy sector.....	9.7
3.3.2.	What can development finance contribute?	9.8
3.3.3.	How much carbon finance will Kyoto mobilise?.....	9.9
3.3.4.	Bridging the finance gap	9.10
4.	The road from Kyoto via Marrakech to Montreal	9.11
5.	Moving ahead on multiple tracks: the upcoming international negotiations.....	9.12
6.	Making the EU ETS fit for the future	9.13
6.1.	Informing the international negotiation process.....	9.14
6.2.	Gradually expanding the internal carbon market until 2012 ..	9.15
6.3.	The emerging global carbon market until 2012.....	9.16
6.4.	Opening the EU ETS further after 2012.....	9.17

TABLE OF APPENDICES

	Page
Appendix 1 Green Paper on greenhouse gas trading within the European Union	279
Appendix 2 Directive 2003/87/EC of the European Parliament and of the Council of 13 October 2003, establishing a scheme for greenhouse gas emission allowance trading within the Community and amending Council Directive 96/61/EC	315
Appendix 3 Consolidated text of Directive 2003/87/EC.....	341
Appendix 4 Directive 2004/101/EC of the European Parliament and of the Council of 27 October 2004, amending Directive 2003/87/EC establishing a scheme for greenhouse gas emission allowance trading within the Community, in respect of the Kyoto Protocol's project mechanisms	369
Appendix 5 Implementing provisions and reports.....	380
