Continuity and diversity? The effects of the Council Trio Presidency on the EU's energy agenda | 14

Philipp Thaler argues that the institutionalized cooperation of three successive Council Presidencies seems to constrain diversity rather than ensure continuity

Capacity mechanisms in the electricity sector in the context of State aid | 29

Marcin Stoczkiewicz demonstrates why centralised capacity mechanisms constitute State aids and how difficult it is to classify them as a compensation for services of general economic interest

Climate change and migration | 51

In light of the upcoming 21st Conference of the Parties to the United Nations Framework Convention on Climate Change **Györgyi Gurbán** highlights the necessity that people can remain in their original settlements in a manner fully consistent with their rights

Regulated prices for gas and electricity The never ending story of Federutility | 56

Jana V. Nysten and **Dörte Fouquet** analyse the development of the case-law of the ECJ, the investigations by the Commission, and the latest trends in Member States

Law making	State of play and perspectives of the negotiations in the European institutions on pending and forthcoming legislative proposals	3
Case law	ECJ applies the VAT regime to gas distribution concessions (Lisboágas), confirms the hierarchy of legal norms (ACER), and finds that tax on nuclear power plants in Sweden is not covered by EU law (Skatteverket)	6
Book reviews	Robison Wells , Blackout; Marc Elsberg , Blackout	11
Country reports	Germany : New allocation process for offshore connection capacity; Ireland : Energy storage and integration of renewables; Greece : Liberalisation of natural gas distribution and other attempts to liberalise the electricity sector	65
On the scene	Diesel's intelligence	75
